ABOUT

Undergraduate IT student at Rajarata University of Sri Lanka with a strong interest in project management and software development. Experienced in coordinating academic projects and applying analytical and problem-solving skills to develop efficient technology solutions. Seeking opportunities to contribute to technology-driven projects while further developing leadership and project management skills

EDUCATION

Bachelor of Information Communication Technology (Hons)	Expected Graduation
<i>Rajarata University of Sri Lanka</i>	2027

- [Current GPA - 3.26 \(Credits - 91\): Reading](#)
- Relevant coursework - Data Science, Fundamentals of Statistics, IoT system Developer, Artificial Intelligence, Database Systems, Design and Analysis of Algorithms, Software Engineer

Electronic NVQ-4 (2 Years)	Completed
<i>Technical College -Kegalle</i>	2021

- Relevant coursework - Circuit analysis, testing, and troubleshooting

CERTIFICATIONS

Trainee Full Stack Developer (Python Track)	Apr 2026
<i>University of Moratuwa</i>	
AWS Certified Advanced Networking – Specialty (ANS-C01)	Mar 2026
<i>LinkedIn</i>	
Project Management Foundations	Mar 2026
<i>LinkedIn</i>	
Generative AI for Project Managers	Feb 2026
<i>LinkedIn</i>	
Deep Learning: Model Optimization and Tuning	Feb 2026
<i>LinkedIn</i>	
Prompt Engineering with Gemini	Feb 2026
<i>LinkedIn</i>	
Introduction to DevOps Tools	Jun 2026
<i>LinkedIn</i>	

A Hybrid Machine Learning Approach for Landslide Susceptibility Prediction

- *Rajarata University of Sri Lanka* Engineering a hybrid machine learning model using Random Forest and XGBoost.
- Processing high dimensional geospatial data and engineered features utilizing NumPy, Pandas, and QGIS.
- Utilized Python, Scikit-learn, NumPy, and Pandas to train models and evaluate performance using AUC-ROC curves and F1 scores

PROJECTS

Smart Shopping Cart System |

Jul 2025 – Sep 2025

Rajarata University of Sri Lanka

- Developed an IoT-enabled smart shopping cart using ESP32, UHF RFID, and Firebase for automated retail experiences.
- Engineered a three-tier architecture with ReactJS to enable real-time billing and QR-based payments.
- Integrated a servo-motor locking mechanism to secure carts until payment confirmation, providing a seamless self-checkout process.

Point of Sales System | [Repository Link](#)

Dec 2023 – Nov 2024

Rajarata University of Sri Lanka

- Built a robust Point of Sale system tailored for retail environments using Java and JavaFX.
- Engineered the backend to handle complex sales processing, inventory management, and reporting via a MySQL database.

Cafe Management System |

Feb 2023 – Nov 2023

Rajarata University of Sri Lanka

- Developed a web-based application to automate cafe operations, including order processing, billing, and inventory management.
- Implemented real-time reporting and secure, role-based access for staff and administrators.
- Built using HTML, CSS, PHP, JavaScript, and MySQL to enhance efficiency and reduce manual error.

SKILLS

TECHNICAL SKILLS

- Programming Languages: Python, Java, JavaScript
- Frontend: Tailwind CSS, React.js, Bootstrap
- Backend: Flask, Django, Node.js, Express.js
- Databases: MySQL, MongoDB, Firebase
- DevOps & Cloud: Docker, AWS
- Version Control: Git, GitHub
- APIs & Security: REST, JWT

SOFT SKILLS

- Problem Solving/ Time Management
- Effective Communication
- Critical Thinking/Adaptability

VOLUNTEER EXPERINCE

Program Manager

ATIT Rajarata - Association of Technology IT

2025 – Present

Project Lead

ROST Rajarata - Robotic Society Of Technology

2024 –Present

Student Union Representative – Academic Affairs

Faculty of Technology – Rajarata University of Sri Lanka

2024 –Present
